

PROGETTO IGIENE

Come affrontare con valutazioni costruttive la realizzazione di aree sanitarie e zone spogliatoio ad alta frequentazione.

PROJECTING HYGIENE

How to approach with constructive thinking the formation of high traffic sanitary areas and changing facilities.

SOEMA
Handcrafted Technology

Handcrafted in Italy

ARTIGIANATO TECNOLOGICO

"L'artigianato Tecnologico" scaturisce da un "metodo filosofico di fabbricazione" il cui risultato è un distillato di rispetto e di sfida. Obbedisce ad un atteggiamento mentale dove il portare a compimento è un viaggio di continua esplorazione e non una destinazione. È una filosofia ed un modo di vivere.

Con la profonda convinzione che la linea adottata dalla nostra azienda rappresenti la scelta equilibrata per perseguire l'eccellenza, lavoriamo con passione al fine di garantire che ogni prodotto finale, ispirato all'"Artigianato Tecnologico Soema", possa rivelare e prolungare la storia della cultura del design italiano e la maestria artigianale umana.

L'eccellenza non è una casualità.

HANDCRAFTED TECHNOLOGY

"Handcrafted Technology" outspurs from a "philosophized fabricating method" based on a distilled result of respect. It abides on an attitude of mind, where fulfillment is a journey of constant exploration and not a destination. It is a philosophy and a way of life.

With unalterable belief, that our company's stance is the balanced choice to pursue excellence, we work passionately to ensure that every final product of the "Soema Handcrafted Technology" can reveal and protrude the story of Italian designing culture and humane artisan mastery.

Eminence is never an accident.

Sistemi Elettronici "No Touch"

L'igiene è salute e SOEMA investe in essa producendo sistemi elettronici altamente funzionali per le zone sanitarie: lavamani con sistemi multiconsole integrati, rubinetteria per lavabi, sistemi di scarico per wc e orinatoiri, lavamani e vasche in acciaio inox, dosatori di sapone, comandi a barriera, asciugamani, sterilizzatori, comandi doccia, sistemi di ausilio per disabili e pavimentazione per cellule bagno. Grazie al pratico sistema no touch SOEMA, siamo in grado di garantire igiene e di ridurre i consumi e gli sprechi d'acqua.

Electronic "No Touch" Systems

SOEMA has made health and hygiene the central target of its production, developing highly functional and maintainable electronic sanitary fixtures: multiconsole integrated hand-washing systems, washbasin taps, flushing devices for urinals and toilets, stainless steel hand-washing units and tanks, soap dispensers, barrier controls, hand-dryers, sterilizers, shower controls, special equipment for the disabled and floor units for toilets. Thanks to the SOEMA no touch systems, we are able to ensure hygiene, consumption reduction and water waste avoidance.

Sistemi modulari in C-HPL

Razionalizzare gli spazi ad alta frequentazione per SOEMA significa riorganizzarli e ottimizzarli con praticità ed efficacia così da rispondere alle esigenze del cliente e del suo utente, sempre assicurando igiene e costi ridotti per la pulizia e per la manutenzione degli ambienti. I sistemi in C-HPL modulari SOEMA includono pareti divisorie flessibili per bagni, anche pavimento-soffitto, porte, cabine doccia, piani lavabo, armadi e panche, realizzati in laminato stratificato con accessori in lega di alluminio anodizzato e acciaio inox.

Modular Systems in C-HPL

For SOEMA, rationalizing space means re-arranging and optimizing it so as to meet the customer's needs in the most effective functional way, thus ensuring hygiene and limiting cleaning and maintenance costs. The SOEMA C-HPL modular systems include floating toilet partitions, floor-ceiling toilet partitions, doors, shower boxes, handwashing tops, lockers and benches, that are produced from compact high pressured laminate, quality anodized aluminum alloy and stainless steel door accessories.

Hygiene & Design - Glass/Petra

Una gamma di soluzioni tecniche in vetro disponibili in qualsiasi colore RAL che rendono esteticamente confortevoli le aree sanitarie ad alta frequentazione garantendo massima qualità, resistenza e affidabilità. Fanno parte della nuova linea: Colour Glass - box, porte e armadi in vetro temperato o in pannelli combinati vetro/porcellana laminata. Tutti gli accessori e i componenti utilizzati sono progettati e prodotti direttamente da SOEMA per renderli coerenti alla filosofia aziendale che risalta il design italiano e la funzionalità dell'artigianato. Notare le combinazioni di box in vetro e porcellana: Petra.

Hygiene & Design - Glass/Petra

A range of glass technical solutions in any RAL colour that makes high traffic sanitary areas & changing facilities visually comfortable by ensuring the best standards of quality, durability and reliability. The following products are part of the new line: Colour Glass - cubicles, doors and lockers in tempered glass or glass/laminate porcelain sheets. All the accessories and components used are designed and made directly by SOEMA consistently with the company's philosophy of handcraftmanship functionality and Italian design. See the glass porcelain cubicle combinations: Petra.

Sistemi Prefabbricati Ispezionabili

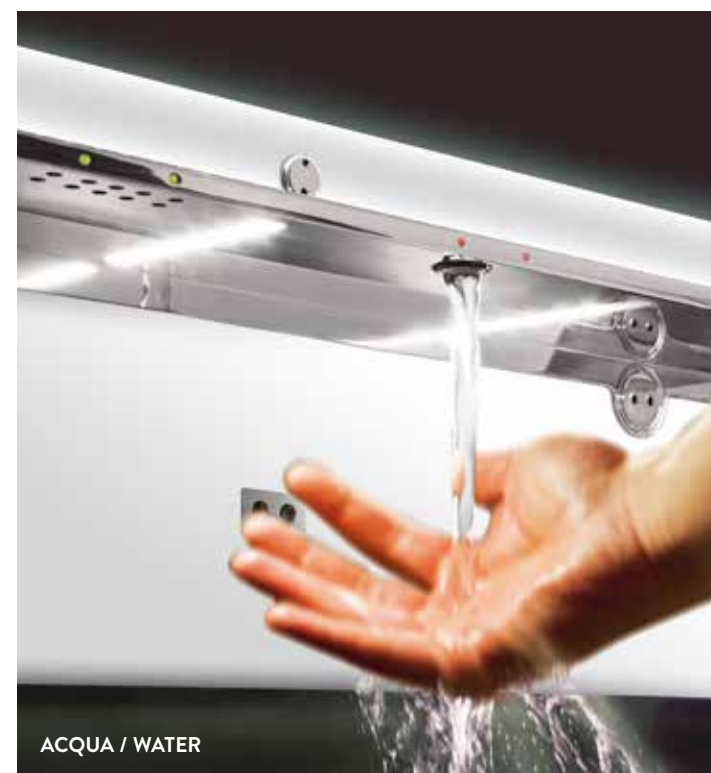

I Sistemi Sanitari Prefabbricati Ispezionabili "SPIS" e il Sistema Modulare Prefabbricato Perimetrale "MOPPS", progettati da SOEMA, sono sicuramente il modo in cui immaginiamo il futuro. Queste eccellenti combinazioni modulari tecnologiche e autosufficienti mirano alla costruzione completa di soluzioni prefabbricate, dopo la conclusione di pavimenti e muri, dividendo, coprendo e arredando aree sanitarie ad alta frequentazione e zone spogliatoio, fornendo anche i sistemi idraulici, di scarico e i sistemi elettrici, il tutto in tempi record.

Prefabricated Inspectional Systems

The SOEMA Sanitary Prefabricated Inspectional Systems "SPIS" and Modular Prefabricated Perimeter System "MOPPS" are certainly, how we foresee the future. These unique modular self-sufficient technological combinations target to construct complete prefabricated solutions after floor tiles and walls are finalised, by dividing, covering and equipping high traffic sanitary areas & changing facilities with furniture, but also with hydraulic, sewage & electric networks, in a record time frame.
